COMMERCIAL SPACES

Our Heritage

A lineage going back two generations, and at the start of the Journey Oak Leaf Conservatories in York was created.

An award-winning heritage based upon understanding accurate period design and artisanship in traditional conservatories including renovation of the Victorian Orangery at Broughton Hall and Gold Medal Winners at Chelsea.

A reputation for delivering unique designs and creating very special buildings and structures.

A Move to the Modern

We decided to use our design skills to explore the latest glass and aluminium technology.

At the heart of our award-winning modern designs are the pioneering roof and door systems which offer the highest possible strength, noise-cancelling and thermal values (up to Passivhaus standards). And the ability to create spectacular structures like this.

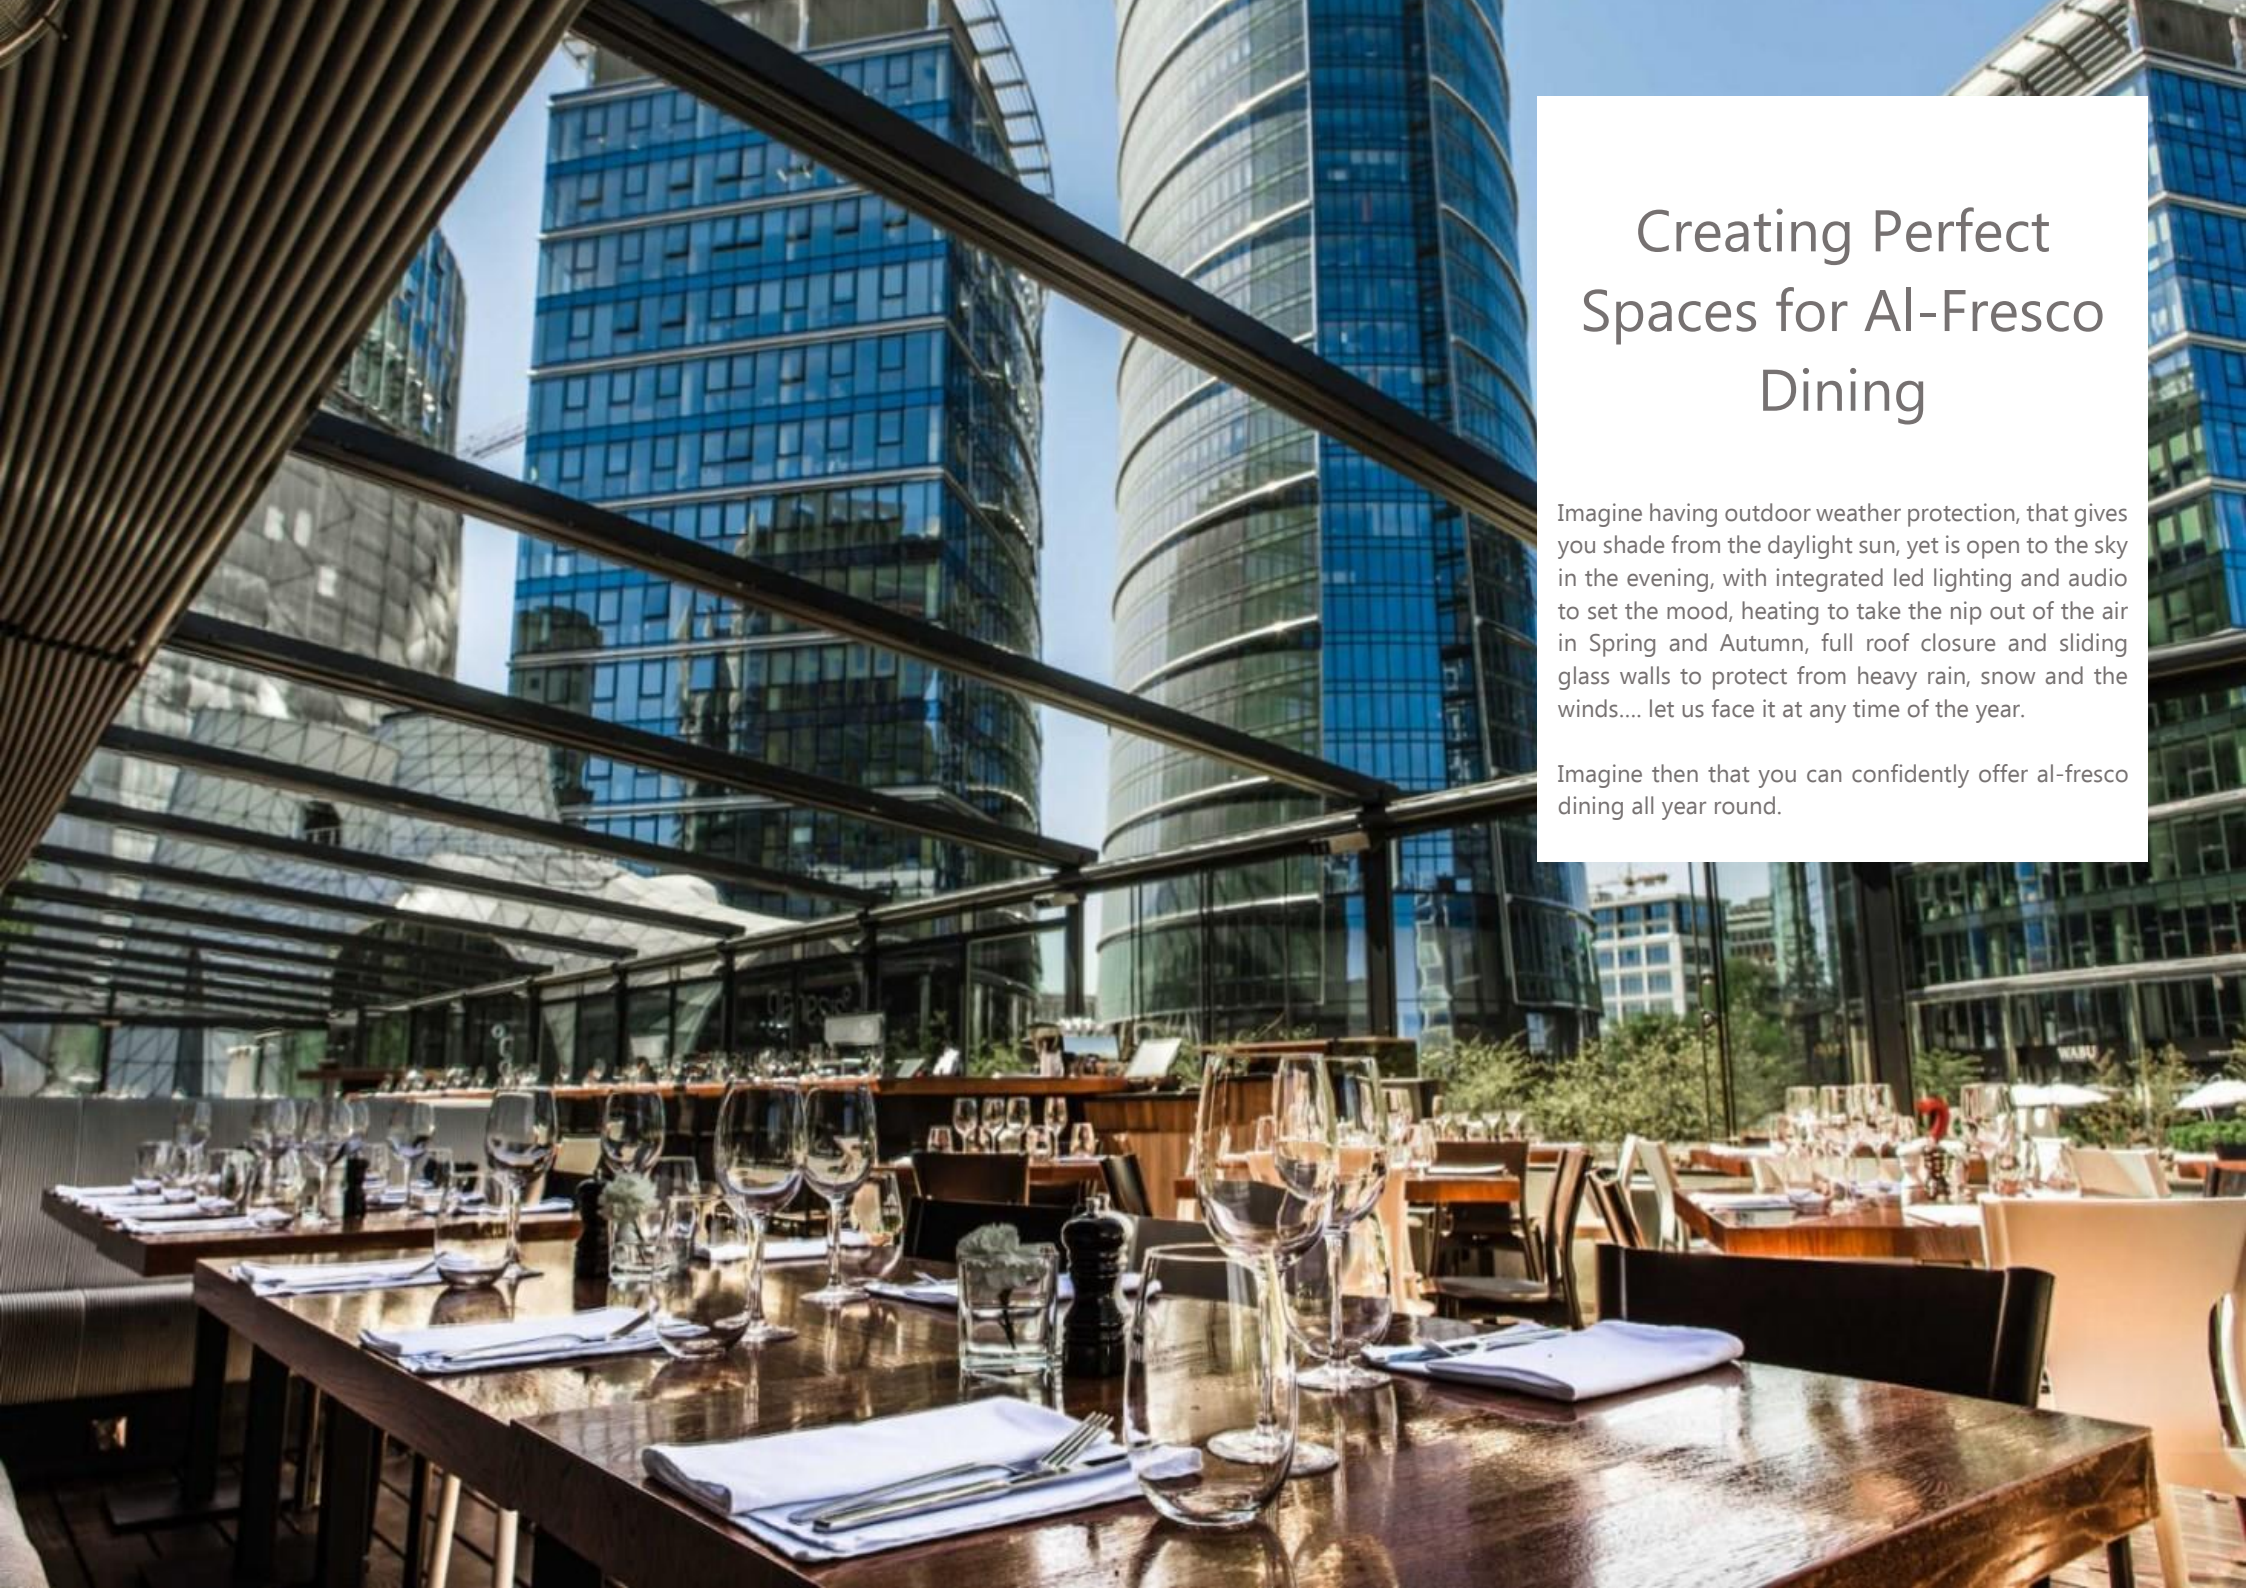

In this Winter Garden the interior climate is comfortable year-round, controlled through the built-in weather station which monitors both the temperature and the angle of the sun, raising and lowering external awnings to prevent heat build-up and deflect the glare.

Bi-fold sliding doors allow the entire building to open into the garden.

The inside/outside feel is heightened by running the same stone flooring through from the entertainment space out onto the terrace.

And thus, Glass House Architecture was Born.

Creating Perfect Spaces for Al-Fresco Dining

Imagine having outdoor weather protection, that gives you shade from the daylight sun, yet is open to the sky in the evening, with integrated led lighting and audio to set the mood, heating to take the nip out of the air in Spring and Autumn, full roof closure and sliding glass walls to protect from heavy rain, snow and the winds.... let us face it at any time of the year.

Imagine then that you can confidently offer al-fresco dining all year round.

Making The Business Case

Everyone likes to wine and dine al-fresco, it's often an enticing environment to attract your clientele. However, getting the most out of your terrace or patio areas is a bit of a problem in the UK climate, even in our summer months.

Parasols and even canvass 'marquees' offer some protection but can't be relied upon, so al-fresco dining is notoriously unreliable. This means you are losing out..... think about this.....

Imagine having outdoor weather protection, that gives you shade from the daylight sun, yet is open to the sky in the evening, with integrated led lighting and audio to set the mood, heating to take the nip out of the air in Spring and Autumn, full roof closure and sliding glass walls to protect from heavy rain, snow, and the winds.... let's face it dining at any time of the year.

- Imagine then that you can confidently offer al-fresco dining all year round.
- Imagine then that you have added permanent covers to your business every single day.
- Imagine then that your customers would love this inviting space and return, time and again.
- Imagine then that all this can be done in an affordable and stunning looking way.
- Imagine then what Glass House Architecture can do for your business.

GLASS ROOFS with GLASS WALLS

Let the natural in.

Protect your guests in all weathers.

Control the sun with an overblind awning.

Keep out the wind and rain with frameless glass walls that slide closed and still allow unobstructed views.

Create a mood with built-in rgb lighting strips that change colour.

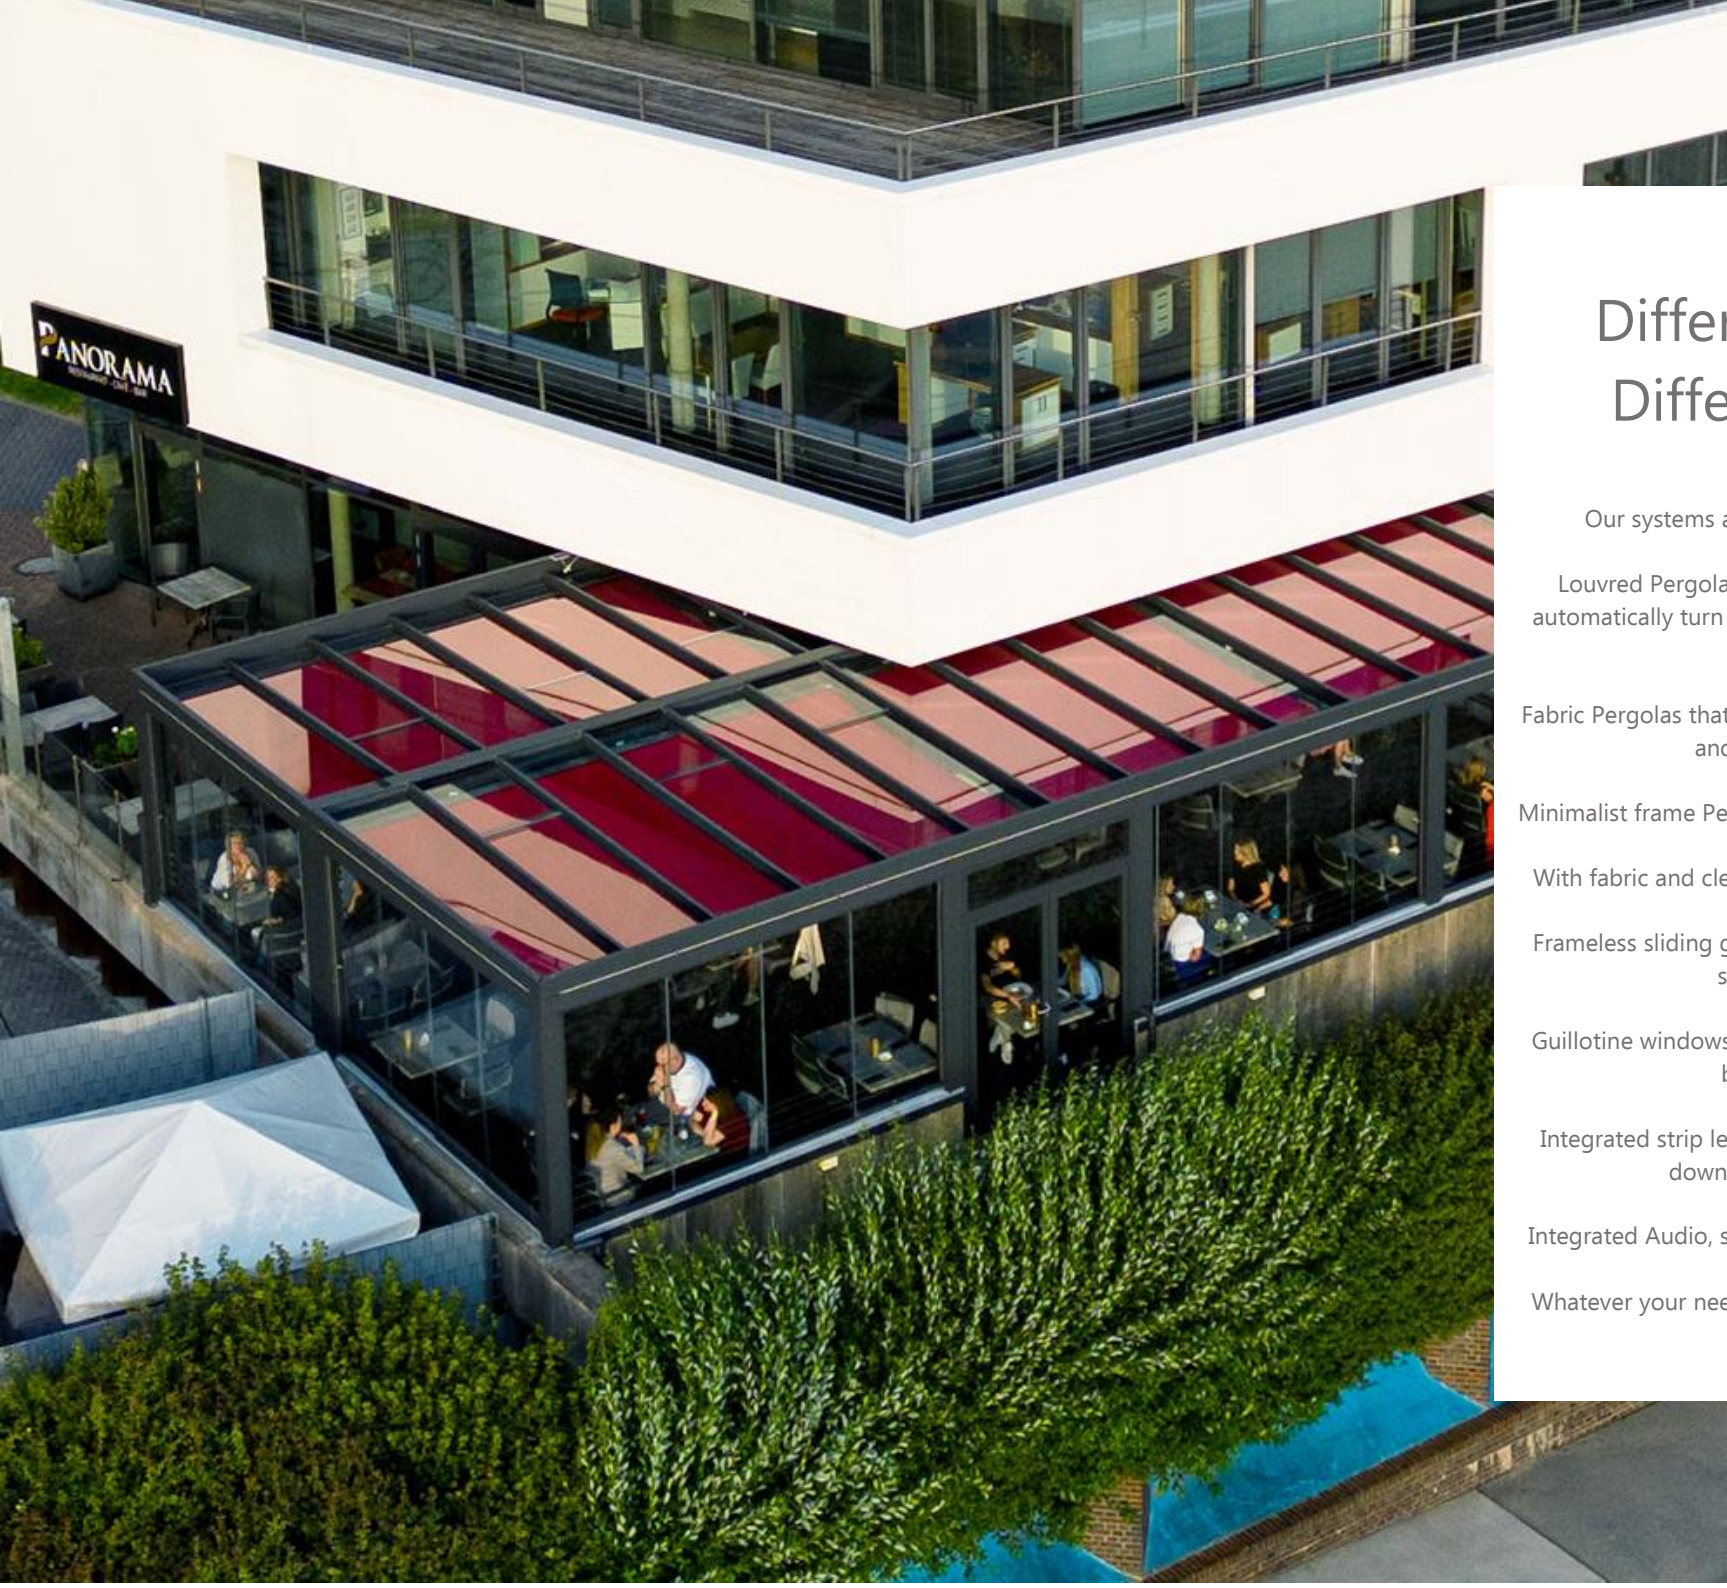

A Statement Dining Space

Private Stand-alone Dining Pods

For seasonal spaces, separate functions, non-permanent installations, or for use in the grounds of protected spaces.

Different Systems Different Spaces

Our systems are designed to suit your space.

Louvred Pergola Systems with electric bladed that automatically turn to meet the sun or close completely weather tight

Fabric Pergolas that can move completely out of the way and open out to the sky

Minimalist frame Pergolas for the latest architectural look

With fabric and clear view blinds for privacy and shade

Frameless sliding glass walls up to 3m high that simply slide out of the way

Guillotine windows that slide down and can be used as balcony balustrade

Integrated strip led or rgb, coloured lighting, plus led downlights to create a mood

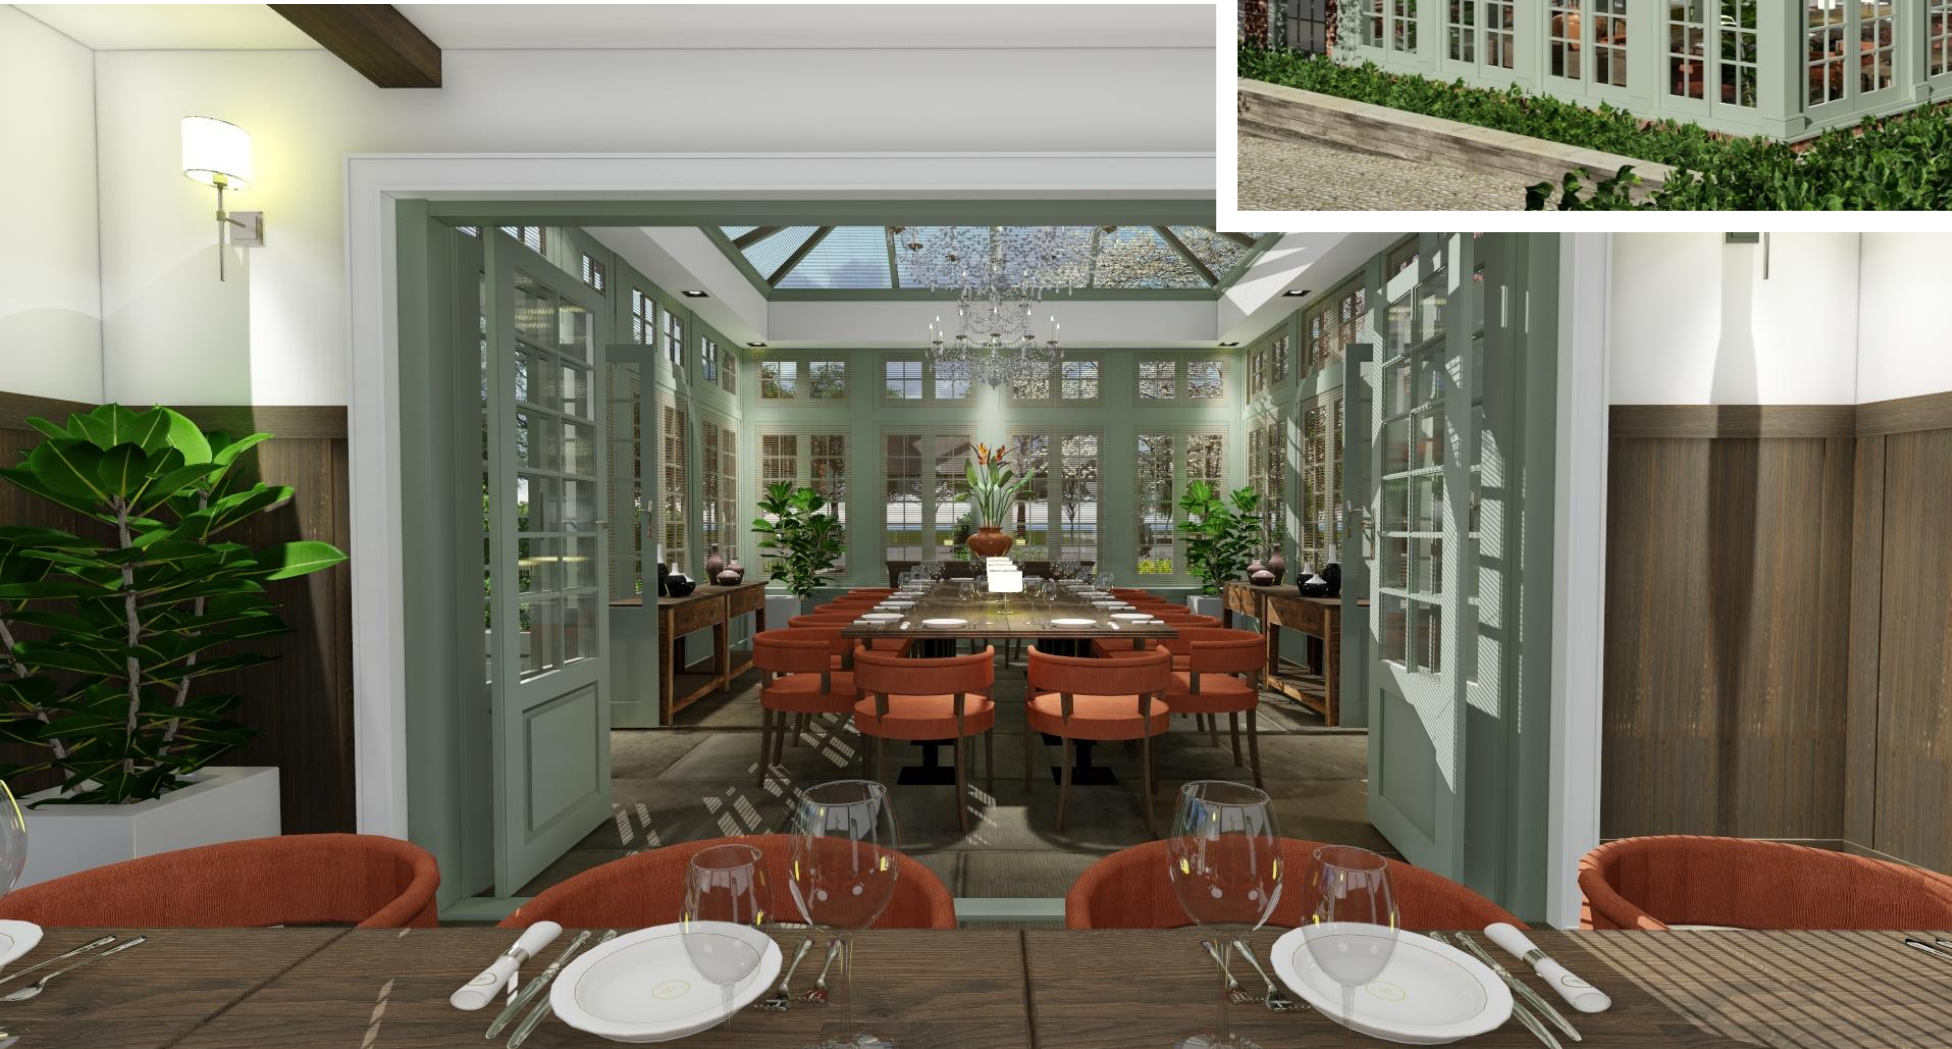

Integrated Audio, set into the pergola posts and beams

Whatever your need our designers can make it happen for you.

Designing for business success

Based upon an initial design consultation our expert team of designers will prepare a detailed proposal, including layout plans, detailed design and the latest in photorealistic imagery to demonstrate how our structures can benefit your business.

We are sure you will be impressed by what is achievable, and it doesn't end there, if you require planning our in-house consultant will take the proposal through planning application, gaining listed buildings or conservation consent and taking the pain out of the process.

Recognising that clients should only have the finest service, products and finishes, our team has spent years forging working relationships with world leaders and innovators in glass and aluminium systems and some of the interior design industry's leading brands and suppliers.

Design. Build. Create.

Glass House Architecture are proud of creating out of the ordinary and innovative living spaces.

Please call us to arrange an appointment with one of our expert designers or drop in to our showrooms and see how we can help you create your dream space.
